Five years after their much-acclaimed album Inaudito, Calomito is coming back with a new great album! Calomito melt with taste avant-prog, Canterbury, jazz and folk, but they give the right space to melody, a typical feature of many Italian bands. Beside usual electric instruments, their arrangements include a peculiarly nice palette of acoustic colours – trombone, violin, viola – that gives the band a really recognizable sound. Sharp and groovy, Cane di schiena is a relevant step forward compared to the first album, being a clear sign of maturity for a band which is considered among the most interesting ones in the alternative Italian music scene, taking the best from the past and revising it in a new direction.
